SEYMOUR WHYTE - VINCI

HW10 Pacific Highway Upgrade

Seymour Whyte Construction in Australia, one of world giant VINCI's subsidiaries, purchased ELKOMIX-240 Stationary Concrete Batching Plant and ELKON Mobile Master-135 Jaguar Mobile Concrete Batching Plant for their HW10 Pacific Highway Upgrade, Woolgoolga to Ballina Project operations.

ELKOMIX-240, thanks to its 9000/6000 l. twin shaft mixer and recently developed fast mixer-feeding technologies, enables a concrete production capacity of 240 m³/h.

ELKOMIX-90 PL

RCPA

Reinforced Concrete Pipe Production

Tailor made precast concrete plant installed in Sydney-Australia for reinforced concrete pipe production was put into operation.

Advanced solutions were applied such as an increased embedded receiving hopper of aggregate pre-feeding system with a reinforced grid; which is having 20 m³ capacity of receiving hopper, vibrating feeder and specially designed reinforced grids on top to feed from dump trucks that can pass over receiving hopper.

This is one of the special projects for ELKON in a light of company's high experience in custom-made projects which was prepared meticulously in the sense of aggregate feeding and supplying of concrete to the rotate moulds.
